Array Word Problems - Answer key

Read the original story. Draw an array and solve the multiplication equation.

1. A baker sets out 2 rows of muffins, with 1 muffin in each row. How many muffins are there altogether?

$2 \times 1 = 2$

Total: 2 muffins

2. A baker sets out 5 rows of muffins, with 5 muffins in each row. How many muffins are there altogether?

$5 \times 5 = 25$

Total: 25 muffins
