Graphing Exponential Functions

Graph the first four exponential functions. For the last four, use the curve and marked points to write $y = a \cdot b^x$.

1. $y = 5 \cdot \left(\frac{1}{3}\right)^{x+2} + 3$

2. $y = 3 \cdot 3^x$

3. $y = 4 \cdot \left(\frac{1}{2}\right)^x$

4. $y = 3 \cdot 2^x + 2$

Graphing Exponential Functions

Graph the first four exponential functions. For the last four, use the curve and marked points to write $y = a \cdot b^x$.

5. Write $y = a \cdot b^x$.

Equation: _____

6. Write $y = a \cdot b^x$.

Equation: _____

7. Write $y = a \cdot b^x$.

Equation: _____

8. Write $y = a \cdot b^x$.

Equation: _____
