Try it yourself

Fair Sharing and Making Groups

Point, build, draw or tell. A grown-up can read each question.

1

Share 18 beads equally among 3 cups. How many beads go in each cup?

2

Pack 20 blocks, 5 in each box. How many boxes do you need?

3

Split 16 counters into 4 equal groups. Draw or use counters. How many are in each group?

4

Three groups have 3, 4 and 5 counters. Move one counter so all groups have the same amount.

5 • Try it if you want

You have 14 blocks you cannot break. Each box holds 4. How many boxes can you fill? How many blocks are left?
