Binomial Theorem

Find requested coefficients and terms, then expand each binomial in descending powers of the first operand.

A. Find the requested coefficient

1. $(3x^2 - y)^3$

Coefficient of: x^4y

2. $(4x^2 - 4)^3$

Constant term coefficient:

3. $(4x + 3)^4$

Coefficient of: x^4

4. $(3x^2 + 2y)^5$

Coefficient of: x^4y^3

B. Find the requested term

5. $(4x - 1)^4$

Term 1: _____

6. $(2x^4 + 3)^3$

Term 4: _____

7. $(4x + 3y)^5$

Term 2: _____

8. $(3x - 4y)^3$

Term 2: _____

C. Expand using the Binomial Theorem

9. $(2x + 3)^3$

Expansion:

10. $(4x - y^4)^3$

Expansion:

11. $(2x^3 - 1)^4$

Expansion:

12. $(4x^4 + 4y^3)^5$

Expansion:
